OSFR Roleplay

Model Field Guide

A searchable tabletop catalog for player-spawned Free Realms models

3,743	520	10
client models	models with known NPC aliases	inferred roleplay categories

Generated from **src/Resources/Models.txt** and **src/Resources/Npcs.json**. Categories are inferred from asset names and metadata; they are navigation aids, not authoritative client classifications.

Catalog revision: **2b155fb** | Generated 2026-07-30

Quick Start

Use model search to discover IDs, then spawn a named piece at your current position and facing. The optional @group label keeps scenes organized.

Task	Command
Show command help	`!mini help`
Place a miniature	`!mini spawn 176 @enemies Briar Wolf`
Search model IDs	`!mini models wolf 2`
List placed miniatures	`!mini list @enemies`
Inspect a miniature	`!mini info nearest`
Speak through a miniature	`!mini say #3 You shall not pass!`
Summarize scene groups	`!mini groups`
Remove one miniature	`!mini remove nearest 20`
Clean up a scene	`!mini clear @enemies`

What the catalog can and cannot tell us

- The model ID and asset filename are authoritative for this server revision.
- Known NPC names are aliases from Npcs.json. One generic model can have many aliases.
- A valid catalog entry can still be invisible, effect-only, incomplete, or extremely large.
- The server uses scale 1.0 when the catalog scale is zero. Test scenery before a live scene.
- Miniatures are session-only and disappear when the zone or server restarts.

Complete Command Reference

Commands begin with !mini in normal chat. A #id identifies one currently placed miniature; use !mini list or !mini info nearest to discover it. Group names begin with @ and organize pieces for listing and cleanup.

Syntax	Purpose	Details
`!mini help`	Show command help	Lists the miniature commands available in game.
`!mini spawn [modelId] [@group] [name]`	Place a miniature	Places a named model at your current position and facing. The group is optional and defaults to @scene.
`!mini models [search|*] [page]`	Search model IDs	Searches client model filenames, descriptions, and descriptors. Use * to browse the complete catalog.
`!mini list [all|mine|@group] [page]`	List placed miniatures	Shows the short IDs used by info, speech, and removal commands in the current zone.
`!mini info [#id|nearest]`	Inspect a miniature	Reports the model, group, owner, and distance for a placed miniature.
`!mini say [#id|nearest] [message]`	Speak through a miniature	Sends local chat from the miniature so nearby players see its name and speech bubble.
`!mini groups`	Summarize scene groups	Lists each group in the current zone and how many miniatures it contains.
`!mini remove [#id|nearest] [radius]`	Remove one miniature	Removes a player-created miniature by short ID or finds the nearest one within an optional radius.
`!mini clear [all|mine|@group|nearby] [radius]`	Clean up a scene	Removes a selected set of player-created miniatures. It never removes normal world NPCs.

Safety limits: each player may place up to 40 miniatures in a zone, each zone may contain up to 200, and placements have a short cooldown. Remove and clear commands only affect player-created roleplay miniatures, never normal world NPCs.

Category Map

The guide groups models by likely tabletop use. Search terms are often more useful than scrolling: try a race, creature, object, region prefix, or NPC name.

Inferred category	Models	How to use it
People and Humanoid NPCs	924	Usually the best miniature candidates. Search by race, job, costume, or a known NPC name.
Creatures and Monsters	285	Animals, enemies, pets, and fantasy creatures. Animation quality varies by model.
Collections, Loot and Rewards	67	Collection piles, coins, chests, and reward props. Useful for objectives and scene markers.
Vehicles and Mounts	180	Mounts, hoverboards, carts, boats, and racing assets. Some expect rider or vehicle systems.
Props and Interactables	115	Portable scene dressing such as crates, signs, food, tools, and furniture-like props.
Housing and Furnishings	851	Housing assets and architectural pieces. Many are useful, but some are very large.
Environment and Scenery	400	Trees, rocks, buildings, terrain, and regional scenery. Test scale before using these.
Jobs, Farming and Minigames	581	Job equipment, farm stages, race parts, balls, and activity-specific models.
Effects and Technical Assets	33	Particles, anchors, triggers, invisible helpers, and test assets. Expect unusual behavior.
Miscellaneous - Needs Testing	307	Assets that could not be confidently classified from client metadata alone.

Starter Models

These IDs are recognizable anchors for testing the command flow. They are not a quality ranking; use the complete catalog and in-game search to branch out.
